/ WORK EXPERIENCE

>> Full Stack Engineer (Current)

Epos Now | 2024 to present

- > Build and ship React + TypeScript applications with MUI, used by merchants in production.
- > Develop backend APIs and services in Go, including background workers and webhook integrations.
- > Maintain authentication and MFA flows with a security-first mindset.
- > Own CI/CD pipelines and production deployments, monitoring with Grafana, Sentry and PostHog.
- > Review code and use AI-assisted tools such as Greptile to keep quality high and move faster.

>> Software Engineer

NTT Data San Juan | March 2022 - July 2024

- > Backend development in .NET, building APIs with .NET Core and Entity Framework.
- > Worked with Azure Service Bus and Azure data storage; wrote SQL Server scripts.
- > Used Azure DevOps for project organization, and completed internal training in React
